

Creating Equal Opportunities of Care For Women

AI-powered Digital Health solutions offering comprehensive monitoring for maternal, fetal, labor, and newborn care

From pregnancy to new born, our innovative solutions improving health outcomes by accurate assessments

About us:

At CareMother we enable healthcare providers to offer at and beyond hospital quality pregnancy and neonatal care with our AI powered decision support tools and real monitoring solutions

Coverage And Numbers

Features For Fetal, Labor and Newborn Monitoring Solutions

AI Powered

Wireless

Central Monitoring

Auto Interpretation

Cloud Based Storage

Real Time Remote Monitoring

Gift the joy of Baby First Heartbeat

Auto Fetal Movement Marking

Single port charging for all components

Central Monitoring system: Reducing Load of Nurses and Doctors

Central monitoring is at the core of our fetal and labor monitoring systems, ensuring seamless, real-time observation of multiple patients from a single location. Our centralized system simplifies workflow, incorporates an alert mechanism, and ensures timely, accurate interventions.

FETAL MONITORING SOLUTIONS

FetoMax

Wireless, AI-Powered Fetal Monitoring for Hospitals

Fetomax Classic

“ Our flagship model, offering essential fetal monitoring capabilities with the precision and reliability ”

Components

- Doppler or FHR Probe
- Toco Probe
- Tablet
- Speaker
- Belt

Fetomax Single Port Charging

“ Enhances the Classic model by integrating a convenient single-port charging system. This all-in-one solution allows to charge all components simultaneously ”

Components

- Doppler or FHR Probe
- Toco Probe
- Tablet
- Single port charging
- Speaker
- Belt

Fetomax with MHR Monitoring

“ Includes Maternal Heart Rate monitoring, which offers critical insights into heartbeat coincidence and other essential clinical parameters ”

Components

- Doppler or FHR Probe
- Toco Probe
- Tablet
- Oximeter
- Speaker
- Belt

FetoTwin

Wireless NST-CTG solution equipped with twin monitoring probes

Twin Probes and Single Kit Charging Port

“ Kit comes with two advanced monitoring probes and a streamlined single-port charging system for effortless management ”

Components

- 2 Doppler or FHR Probe
- Toco Probe
- Tablet
- Single port charging
- Speaker
- Belt

MHR Version for Heartbeat Coincidence

“ This version includes MHR for accurate detection of heartbeat coincidences, ensuring optimal monitoring ”

Components

- 2 Doppler or FHR Probe
- Toco Probe
- Tablet
- Belt
- Oximeter
- Speaker
- Single port charging

FetoMini

Compact NST kit with software application support for OPD set up

FetoMini

“ A compact NST kit designed for OPD setups, offering a small, portable solution with software application support for seamless monitoring ”

Components

- Doppler or FHR Probe
- Belt
- Speaker

YOUR CO-PILOT COMPREHENSIVE LABOR MONITORING SOLUTION

The Labor Monitoring System (LMS) offers a solution for monitoring maternal and fetal health during labour, featuring a digital partograph. It enables real-time tracking of vital signs and assisting healthcare providers in timely interventions. This system improves accuracy, reduces manual workload, and provides alerts for any deviations from normal labour pattern

Timely Alerts

Real Time Monitoring

Dynamic Digital Partograph

Automation of Vital Signs Capture

LAST MILE PREGNANCY CARE

AnandiMaa

A Compact & Portable Pregnancy Care Kit

The solar-powered AnandiMaa platform, with 500000 + ANC test across countries against 120000, provides antenatal care in remote areas. Using point of care screening test kits, frontline workers perform essential antenatal tests to detect high-risk pregnancies early. The CareMother AnandiMaa app supports timely interventions, helping reduce maternal and neonatal risks. Over 500,000 ANC tests have been completed, improving care for mothers previously without access. AnandiMaa is transforming maternal health in five countries

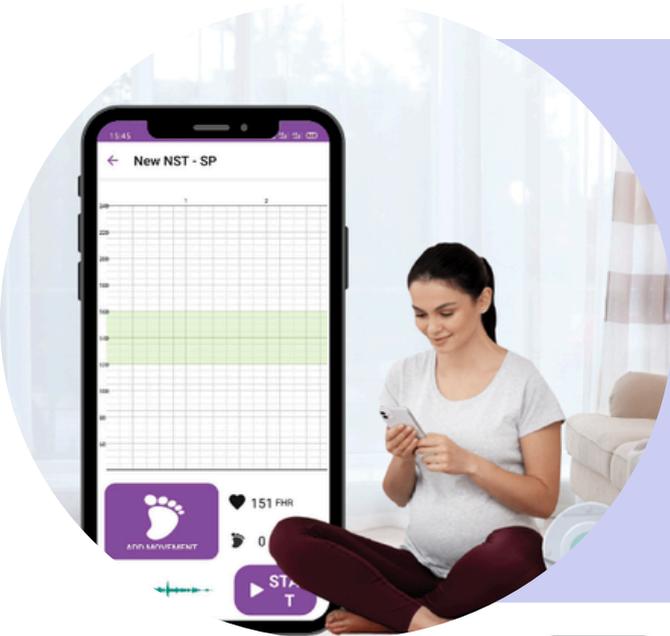

HOME MONITORING

BabyBeat

A Fetal Heart Rate Monitor For Expecting Mothers

BabyBeat comes with a supporting app that helps to find and track your baby's heartbeat. With BabyBeat, expecting moms can easily perform NST at home and share the reports with their doctors if required

BabyBeat Rhythm

The BB Handheld is a smart, easy-to-use device equipped with a clear smart screen, making it perfect for quick and efficient fetal monitoring.

BabyBeat Tune

Designed for seamless NST tests, allows for non-invasive monitoring. Simply place the belt and Doppler for accurate, hands-free testing.

BabyBeat Pro

BB Pro offers enhanced accuracy, making it ideal for more detailed fetal monitoring needs

NEONATAL MONITORING

ApneBoot

APNEA AUTO-RESOLUTION SYSTEM

Detect and Correct apneas faster in premature and newborns:

A system which uses an in-built pulse oximeter to continuously monitor pulse rate and oxygen saturation. In the event of apnea, it vibrates the foot sole of the newborn, stimulating the nervous system to quickly restart breathing.

Resolves apnea
70% faster than
a nurse

Effective alarm
system for
bradycardia

Accurate at
detecting apnea in
the baby

TempWatch

TempWatch continuously monitors newborns' temperatures, enabling early detection of hypothermia, especially in low-birthweight and premature infants. The device provides real-time alerts, helping hospital staff take immediate action to prevent complications and improve neonatal care. It enhances monitoring in both neonatal and postnatal settings, supporting better care.

TESTIMONIALS

It was a great experience having FetoMax machine, right from my counseling, to buying, gave me a grace period by supporting to set up the machine in my clinic and when i was not convinced online, one of the FetoMax member came to odisha. Taking my positive/negative reviews and executing them is really great. Very professional and giving it a personal touch too. Hope i will get a great service in the future too.

Dr. Swapnita Hota Bhubaneswar

Thank you soo much for inventing this Device . For twin or multiple pregnancies it really helps alot. My gynec suggested me to use this machine for tracking my twin babies heart rates and movements which really made me easy to track my babies heart rates & share my reports directly with my dr through their app. I'll definitely recommend this device.
